

Interviews and Articles

'Samen voor ons eigen: hoe burgercoöperaties de overheid vervangen', *Vrij Nederland*, 17 August 2016. The authors of this extensive article have focused on the pros and cons of the current 'wave' of emerging collectivities in the Netherlands. Questions discussed are e.g.: how to make sure that more than only a limited and privileged number of citizens will benefit from new collectivities, how citizens' collectivities can affect, cooperate with, and improve regular 'old' institutions, how to create wide support in order to create a sustainable basis for managing citizens' collectivities (instead of a small and therefore vulnerable group of highly motivated volunteers). Tine De Moor is among the interviewed experts on this issue.

'Hoogleraar economisch-sociale geschiedenis Tine de Moor: "Coöperatieven moeten meer van zich laten horen"', *Sprank* [July 2016], 4-5. Tine De Moor was interviewed for *Sprank*, journal of [Divosa](#), a Dutch association of managers in the social domain of society, about the current emergence of cooperatives and the comparison with their historical predecessors, such as guilds, water boards, et cetera. The article especially focuses on the research performed on the sustainability aspects of such institutions.

'Aantal coöperaties in Nederland explosief gestegen', *Nieuwsuur*, *NPO 2*, 16 June 2016. The daily news documentary program *Nieuwsuur* broadcasted an item on the emergence of numerous new cooperatives in the Netherlands: the number of cooperatives increased from c. 1,700 in 2014 to over 2,500 in 2016, according to data provided at the day of this broadcast by the [Dutch Council for Cooperatives \(NCR\)](#). Tine De Moor is interviewed as academic expert on this issue [interview fragments at 02:09-02:27 and 04:44-05:10].

deVolkskrant

'Burgers die wetenschap helpen, willen vooral leren', *de Volkskrant* [16 June 2016], 25. In this newspaper article, published in relation to the [KNAW Symposium on Citizen Science](#) (Amsterdam, 16 June 2016), Tine De Moor is among those interviewed about research projects that use Citizen Science. The article mainly focuses on the main incentive for participants of such projects, which seems to be the learning aspect rather than actual rewards.

'Do ut des: het principe van wederkerigheid. Historica Tine de Moor over citizen science en burgercollectieven', *EOS wetenschap*, [online, 13 June 2016]. In this article, Tine De Moor is interviewed about the opportunities Citizen Science might have to offer to scientific research and which challenges are to be faced in this matter. An important topic in this regard is the reciprocity between scientists and the Citizen Science-participants; also, Tine De Moor stresses the importance of knowledge valorization. The interview is part of the initiative to create [an online platform for initiatives based on Citizen Science](#), managed by EOS magazine.

'Burger en wetenschap gaan in ondertrouw: Vijfhonderd vrijwilligers visten samen zeven miljoen gegevens uit handgeschreven archiefstukken', *Trouw*, 4 June 2016, pp. 16-17. In this news article, Tine De Moor is interviewed about Citizen Science, more specifically about the [Citizen Science-project 'Ja, ik wil!'](#), which was completed in February 2016, resulting in data collected by nearly 500 volunteers from almost 100,000 Amsterdam pre-marriage registrations, dating 1580-1810. The interview is also a prelude to the national [Citizen Science-symposium](#) organized by the Royal Netherlands Academy of Arts and Sciences, to be held 16 June 2016 in Amsterdam.

How to govern a nature reserve, while at the same exploiting its resources commercially? In this publication by [Noorderbreedte](#) social scientists [Tine De Moor](#) and [Maarten Bavinck](#) contribute two new dimensions to this discussion. They suggest that sometimes it is even better for nature if users harvest some of the natural resources; this however requires that boundaries and limitations are clearly indicated, observed, and guarded by the government.
